

JAMESON WILLIAMS

(978) 621-5878 jameson@jamesonwilliams.com Seattle

A software engineer with eight years of industry experience in web services, mobile software development, and embedded systems. My current interest lies in developing highly available client/server infrastructure. Committed to driving sound engineering practices as a tenet of organizational culture.

Amazon **Software Development Engineer**

Seattle
08/16 – Shipped EC2 Systems Manager, a globally-distributed public cloud service for managing EC2 instances. Contributed features to Alexa back-end.

Intel **Lead Software Development Engineer**

Portland
